BY SWISS KRONO GROUP

**Beautiful, durable, and affordable, Kronotex combines German engineering with the beauty of timber to deliver stunning laminates that mirror solid wood floors.**

Kronotex's cutting-edge surface structures collide with authentic timber patterns to create strikingly realistic woodgrains. The breadth of woodgrains and colours intertwine the traditional styles with the latest European trends, resulting in designs that are both timeless and alive with personality. From deep, dark, and elegant to light and weathered, there is a Kronotex design to elevate your interior style.

The enviable quality of German manufacturing means Kronotex Laminates are so robust they can be installed in both commercial and residential settings, making them perfect for busy Australian homes.

## WATER RESISTANT LAMINATE FLOORING

Resin-rich pine from Germany and a sophisticated construction technique create a moisture guard core that results in significantly reduced swelling of the laminate flooring. All decors within the ROBUSTO range feature the water resistant moisture guard core.

Kronotex decors with moisture protection are forgiving to liquid accidents making them a stress-free choice for households with children and pets.

Traditionally, laminate floors could only be cleaned with a slightly damp wipe. Now, floors with moisture protection can be easily cleaned with a damp mop.

Like all wood-based products, this laminate flooring will react to excessive moisture by expanding or contracting accordingly. Although designed for improved resistance to water and moisture, it is not waterproof and excessive wetting and standing water should be avoided.

**Suitable for** kitchens, entrance areas and spaces where laminate flooring is traditionally installed including bedrooms and living rooms.

**Not suitable for** outdoor areas or rooms with a permanently high moisture load such as bathrooms, shower cubicles, saunas and rooms with floor drains.

# ROBUSTO

EXCLUSIVE to Carpet Court

If water resistance is a priority when choosing your floor, then ROBUSTO is the ideal choice. With added moisture protection and a high density 12mm thick carrier plate, ROBUSTO stands for maximum resistance. The range's beautiful colours are enhanced by the authentic wood grains and micro bevel edges. ROBUSTO is so sturdy it will maintain its beauty over time, taking on the daily demands of life and more. Boasting an AC5 abrasion rating and Use Class of 33, Robusto is robust enough for both residential and heavy traffic commercial spaces.\*

## SCOTIA

Kronotex Scotia is the perfect finish for your laminate floor. Scotia is a decorative moulding used to cover the gap without removing the skirting. Scotia is fixed to the skirting board and over the top of the flooring around the perimeter of the wall for a polished professional look. Available in a range of complementary and direct match colours for a modern, seamless finish. Ask your Kronotex retailer for more information.

# STRUCTURES

## MX / Matrix

An advanced technique which uses the contrast between matte and gloss finishes to create depth and mimic the deep grooves of wood grains.

MX / Matrix

## RE / Registered Emboss

A textured surface layer matches perfectly with the pattern of the grain beneath it to create a beautifully realistic surface that is difficult to distinguish from hard-wood floors.

RE / Registered Emboss

## CP / Chrome Pore

A shine effect is added to the grain pattern to play with light and add depth to the floor's finish.

Shine Effect

CP / Chrome Pore

## ML / Matte Look

With a waxed look and feel.

ML / Matte Look

## AF / Authentic Floor

A highly detailed finish that results in a vivid and natural wood texture.

AF / Authentic Floor

## UL / Used Look

A decorative finish that mimics the weathered look of well-loved hard-wood floors to create a beautifully realistic used look.

UL / Used Look

## PR / Wood Pore

Typical wood structure.

PR / Wood Pore

## WG / Wood Grain

An emboss that provides a rustic look.

WG / Wood Grain

# BOARD CONSTRUCTION

Kronotex laminates consist of a minimum of four stable layers which ensure the extraordinary durability and unique quality of Kronotex floors.

- A** The top surface of the flooring consists of a specially resistant protective overlay film. This is fused with an attractive resinated decorative film into a practically abrasion-proof, hardwearing surface.
- B** Extremely dense HDF fiberboard forms the supportive core (HDF, E1).
- C** On the undersurface of the core, a dampness impeding stabilization film ensures and preserves the high structural stability of Kronotex laminates.

# THE CLIC-SYSTEM

Installing a floor becomes child's play: Simply unpack, lay, snap together and done. No effort involved – your hammer and block can stay in the tool box.

Long side

Short side

- Much easier to install.
- Up to 50% quicker to install.
- No hammer, tapping block and pulling bar required.
- Safe and stable.
- You can walk on the floor immediately after installation.

## **KRONOTEX FLOORS – THE ENVIRONMENTALLY FRIENDLY OPTION**

**A desire to continue to reduce our reliance on single use plastics has seen an increase in the popularity of sustainable and natural flooring options such as laminate. As a reputable German manufacturer, Swiss Krono has embraced eco efficiency and sustainability within the company's core values and corporate objectives.**

We use our 'management for the earth' programme to raise the level of environmental awareness in the entire Swiss Krono team and consequently, our supply chain. Our environmental management efforts focus on achieving the eco-efficiency defined in our corporate objectives. Every product that leaves our factory must exhibit both excellent price/performance and superb environmental compatibility. This starts with the exclusive use of legal, certified raw materials from sustainably managed forests, continues with rigorously monitored production, and is also ensured during subsequent utilisation and ultimate disposal of our products.

### **DID YOU KNOW?**

- **Kronotex laminate floors are manufactured using more than 90% of wood based materials from sustainably managed forests that are both FSC and PEFC certified.**
- **All Kronotex laminate floors are manufactured using formaldehyde free binders, meaning they are practically odourless and have extremely low emissions.**
- **All Kronotex laminate floors are 100% recyclable.**
- **No Halogens, PCB, Dioxins or other contaminants are used in the manufacturing of a Kronotex floor.**
- **Kronotex floors are easy to maintain and can be cleaned without the use of harsh chemicals.**

As society becomes more environmentally conscious and aware of its own carbon footprint, we continue to seek cleaner and greener options and ways of living.

**We have a clearly defined goal:** we want you, ourselves, and future generations to continue enjoying life and good health on our unique blue planet. We are therefore continuing to develop eco-friendly wood-based materials that are healthy for you and the environment alike.
