

MOZART

WELD ROD TRIMMER C80

Code: C80

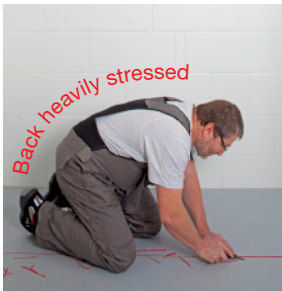

The Mozart C80 Weld Rod Trimmer is designed to cut hot weld after welding. The design enables the user to cut off the excess weld, leaving a small amount for cooling purposes, after which the guide plate is twisted around revealing the cutting blade. The tool is ergonomically designed to fit comfortably into the hand and has less exposed cutting edge (safety in mind) as the cutting edge is the same or similar size to the width of the weld rod.

With the highest quality German carbol steel blades last a lot longer particularly on safety flooring, you do not have to sharpen the edge as previous spatulas, you just change the blade.

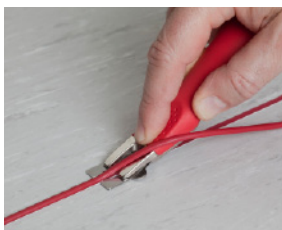

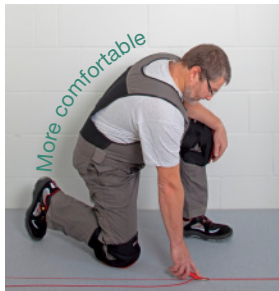

C80 Mozart Weld Rod Trimmer

- Efficient and easy. Prevents nearly all damage to floor covering and guarantees uniform trimming results
- Interchangeable trimming blade. No separate guide plate needed
- Ergonomic - used with only one hand means less strain on the back and a more natural posture
- Made in Germany

Traditional Quarter Moon Knife
